

Charles Dacey

I am a spry, energetic survivor of thirty-four years of public schools. Retirement was not for me. Fortunately I was able to find a second life in Catholic Schools. Thus far, I have very much enjoyed the experience as the caliber of student has surpassed that which I was familiar with. I also bring an extensive coaching background to my classroom. This captures my educational philosophy as I feel that we must find different ways to challenge a student, bring him or her to a higher level, and create a confidence that allows the individual to grow and accept greater challenges.
